Gary –

Just got the lab cost estimate back from GCAL. Below is a summary the analytical costs for TCLP and SPLP analyses. VOCs will have two extractions – one for TCLP and one for SPLP. All other analyses, SVOCs, metals, pest, PCB, and herb are lumped into one extraction for TCLP and one extraction for SPLP.

VOCs by 8260 - \$70
VOC TCLP extraction - \$35
VOC SPLP extraction - \$35
SVOCs by 8270 - \$150
Pesticides by 8081 - \$70
PCBs by 8082 - \$46
Herbicides by 8151 - \$90
TAL metals by 6010 - \$90
Mercury by 7470 - \$16
TCLP Extraction - \$35
SPLP extraction - \$35

SUBTOTAL - \$672

TOTAL X 3 (one set for each pit) = \$2016 (+G&A)

Just wanted to get you this cost info, we'll get the samples prepped and shipped out next week.

Thanks,

9522519
